| Vistas 2D superior |                                     | Cont: | 07 |

The diagram illustrates the rack layout for a 5U system, showing the installation of various modules and their connections. The layout is organized into five horizontal sections, labeled A through E, corresponding to the rack's vertical slots.

**Section A:** Contains the -12PS1 power supply module.

**Section B:** Contains the -12XPS terminal block and the -11SK1 switch module.

**Section C:** Contains the -11Q1 and -11Q2 terminal block, the -11XPVAC terminal block, and the -11X220V terminal block.

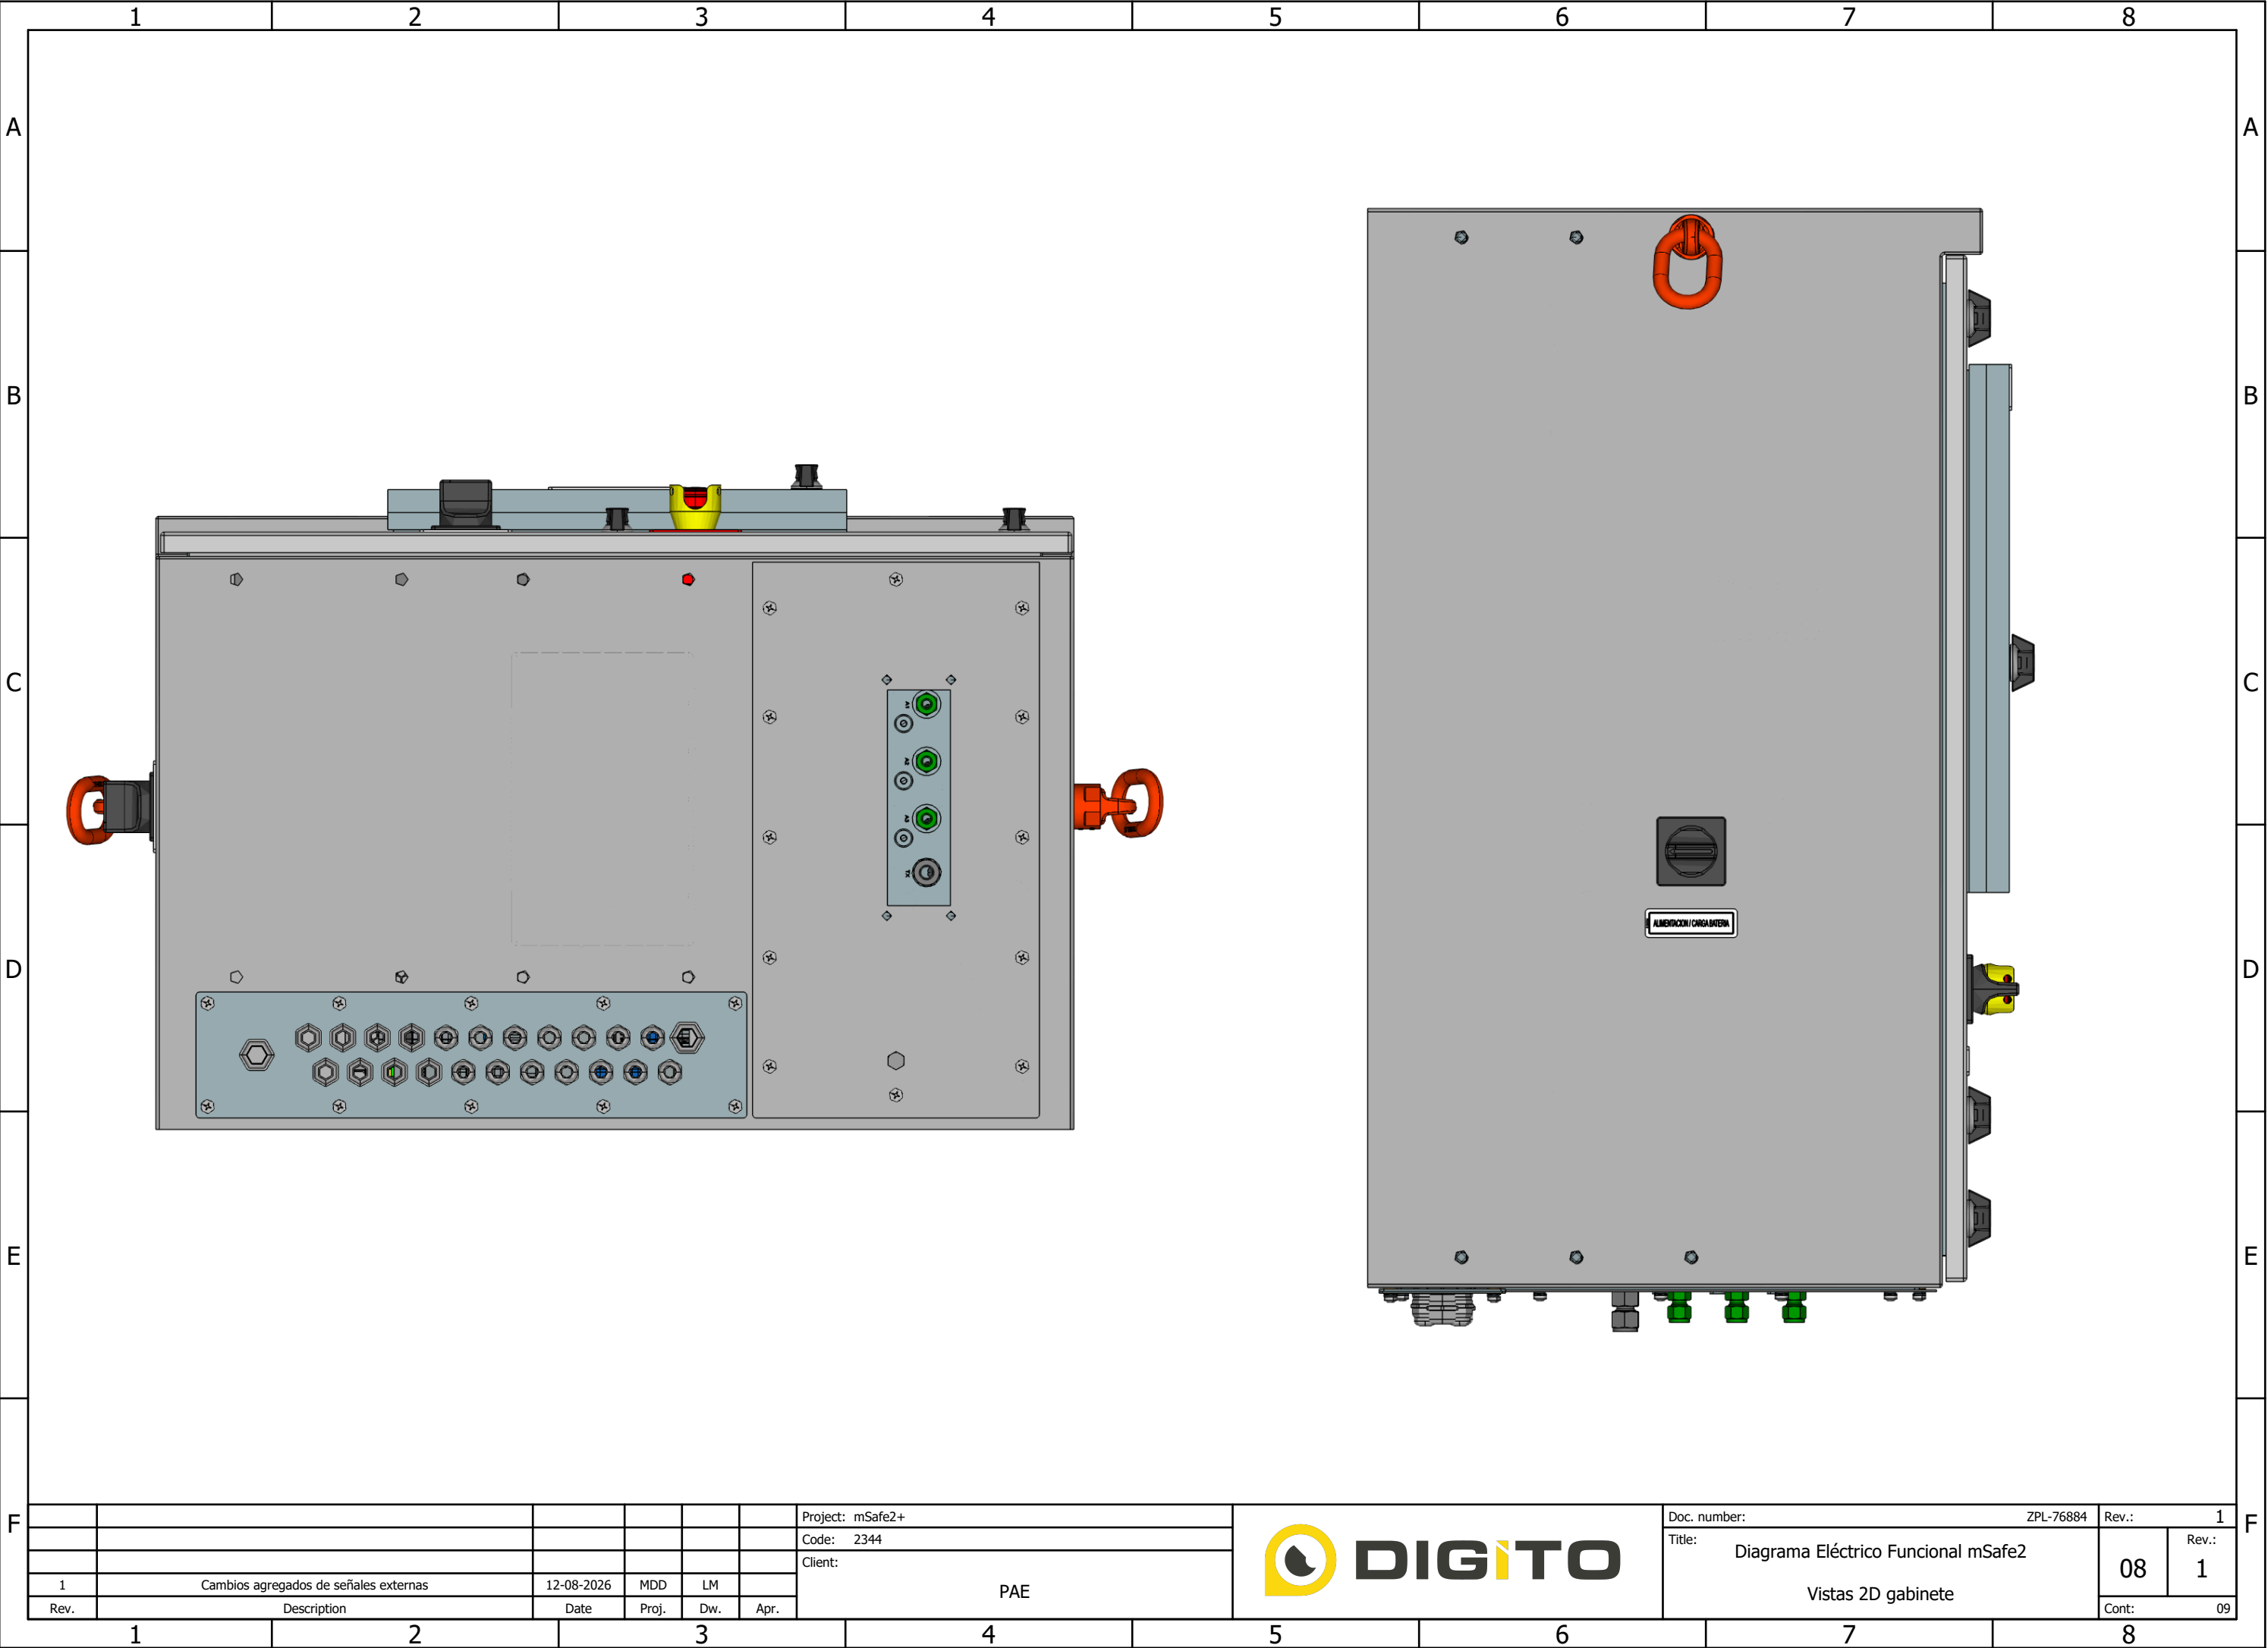

**Section D:** Contains the -11PS1, -11PS2, and -13PS1 power supply modules, the -11F1, -11F2, -12F3, -13F4, -13F5, and -13F6 terminal block, the -42KS1 terminal block, the -42KR terminal block, the -61KR terminal block, the -32XAI terminal block, and the -XPE terminal block.

**Section E:** Contains the -15AIB1, -15DIB1, -15DIB2, and -15DIB3 terminal block, the -15XR terminal block, the -42XC terminal block, the -81XCM terminal block, the -32XEX terminal block, and the -41XEX terminal block.

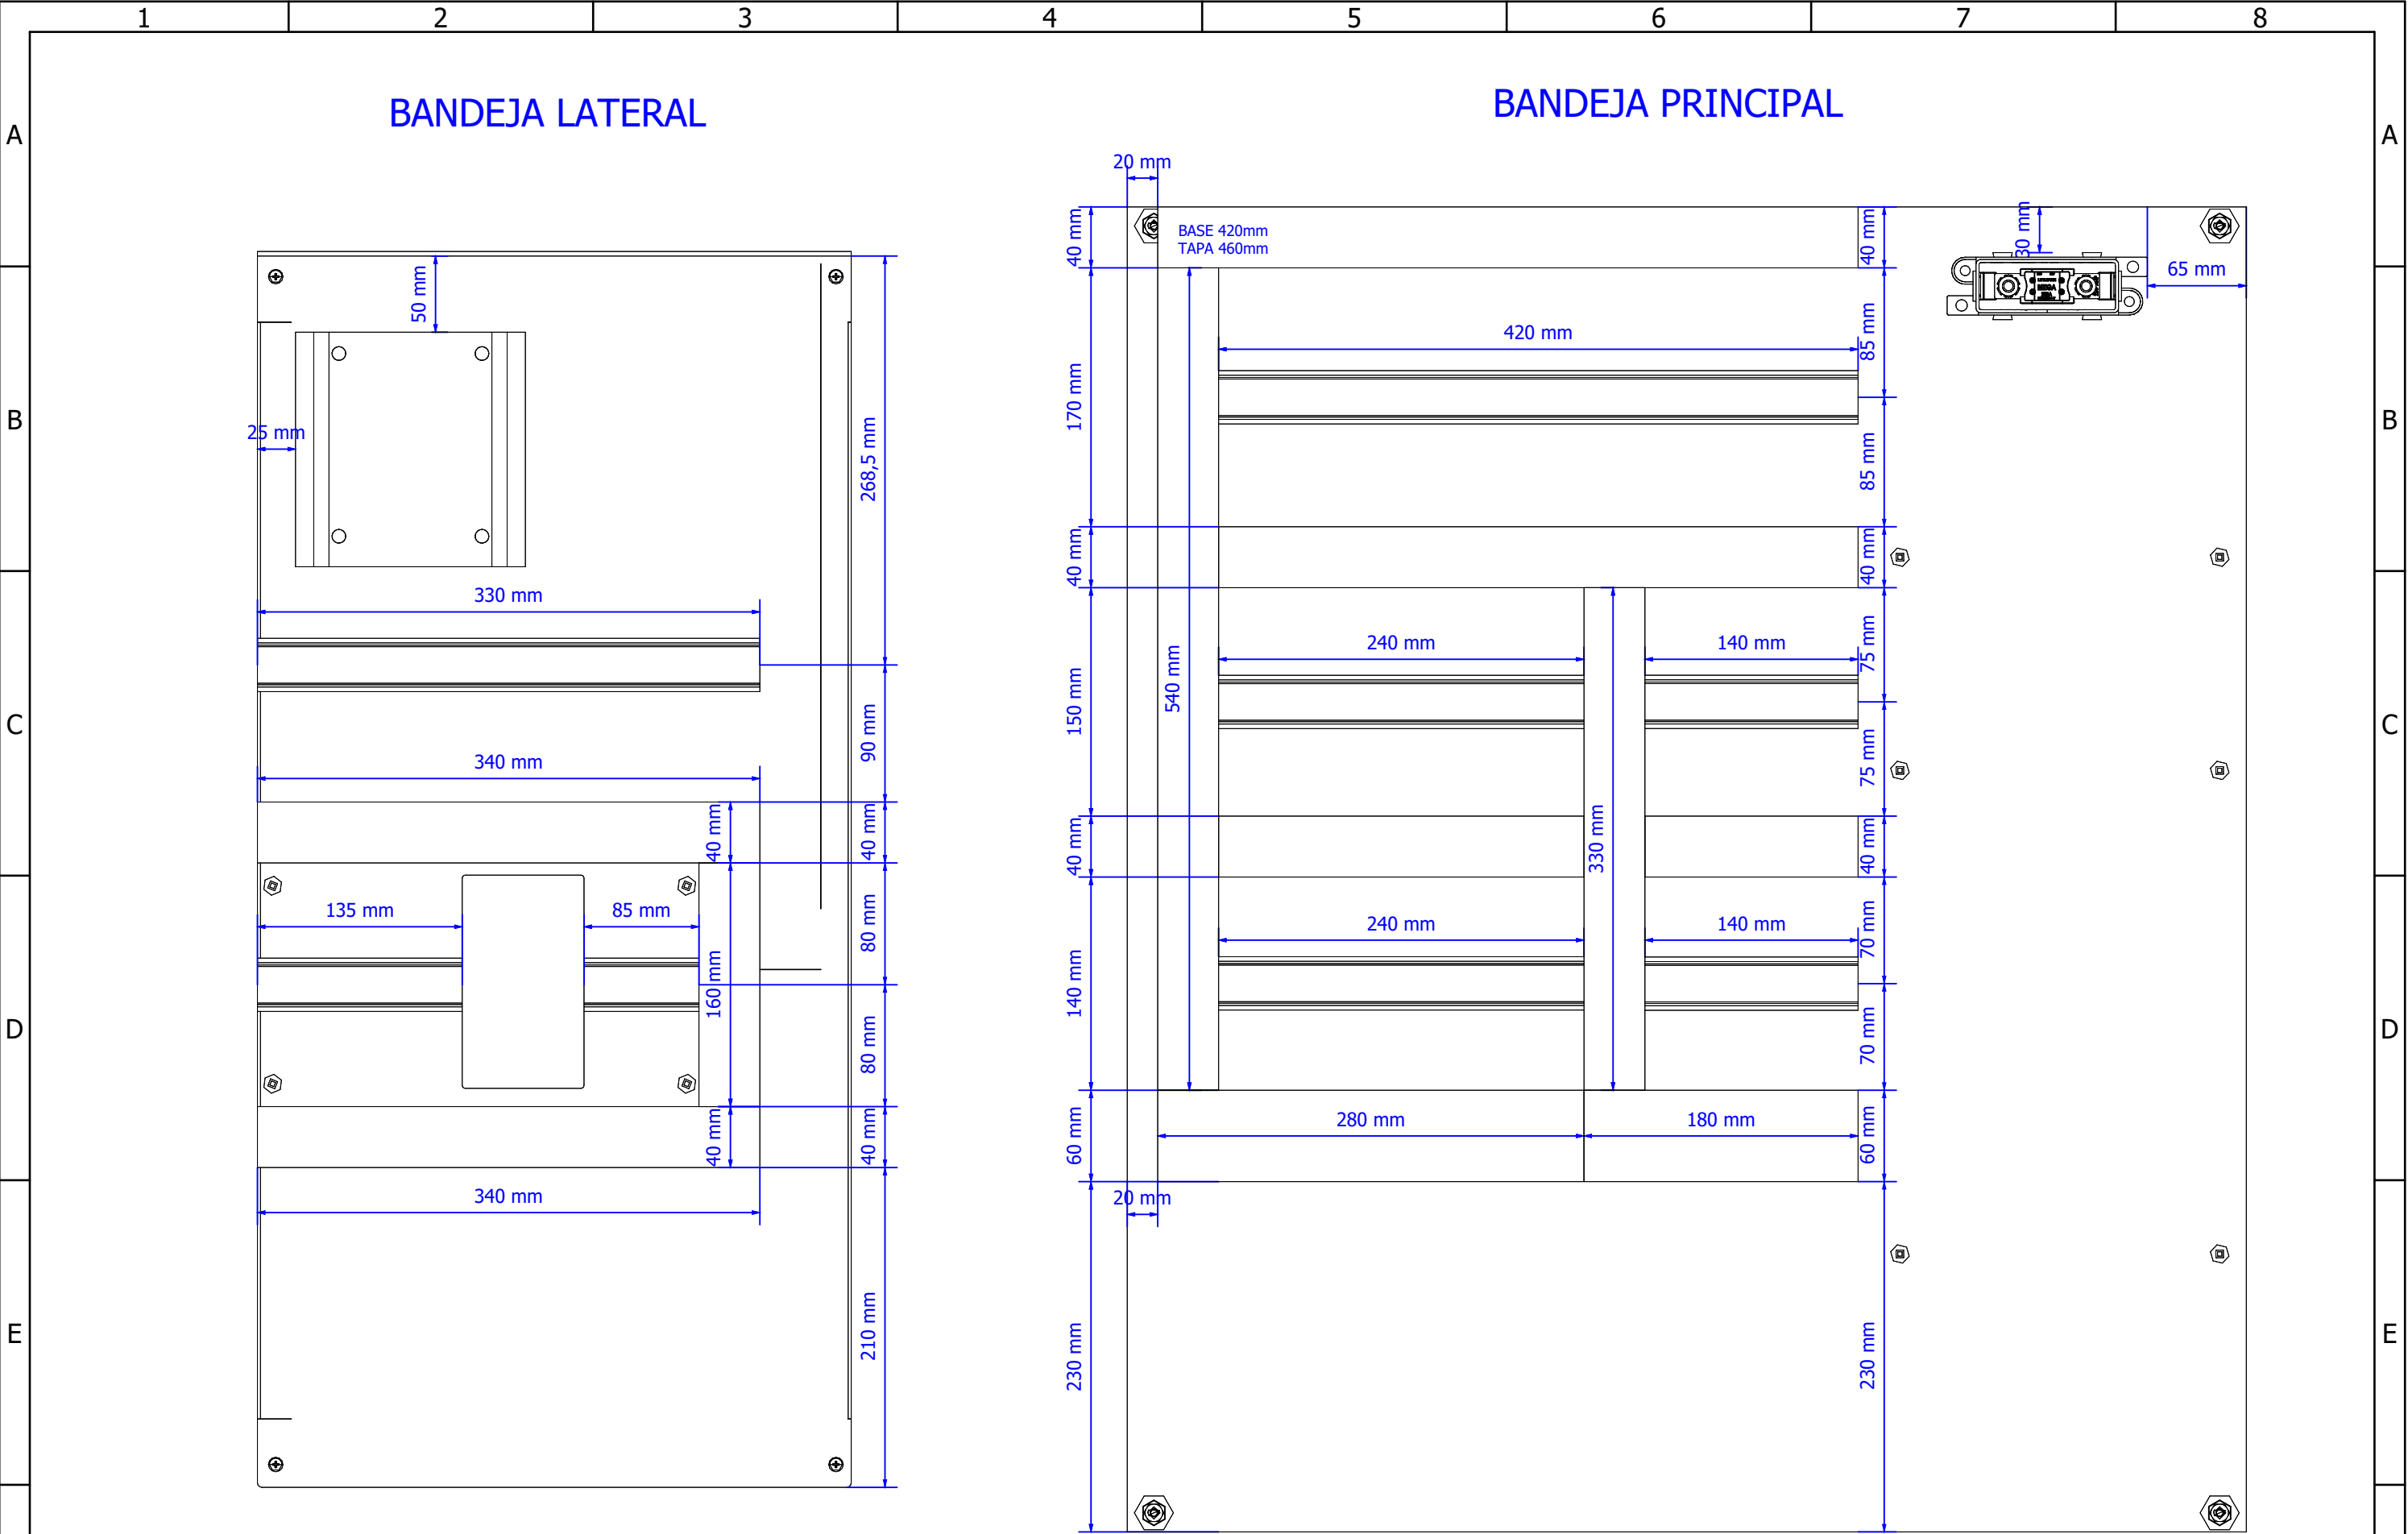

The diagram also shows the connection of various cables and the location of the rack's front and back doors.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  | 2 |  |
